

Tips to Confirm Representation and Warranty Relief through Loan Selling Advisor®

Loan Selling Advisor® is Freddie Mac's pricing, contracting, and loan delivery tool. For loans submitted through Loan Product Advisor®, Loan Selling Advisor confirms a loan's eligibility for representation and warranty relief for collateral, income and asset. Representation and warranty relief for each is effective upon Freddie Mac's purchase of the loan. This reference guide provides information on how to use Loan Selling Advisor to confirm a representation and warranty relief status (the overall relief decision).

Representation and Warranty Relief Types through Loan Selling Advisor

To obtain representation and warranty relief, the data on the Loan Product Advisor Last Feedback Certificate must be consistent with the data delivered in Loan Selling Advisor. If there are material changes to the loan file after Loan Product Advisor completes the assessment, the loan may no longer be eligible for representation and warranty relief. The representation and warranty for each relief type is then confirmed through the Loan Selling Advisor assessment process.

See the table below for a description of each relief type:

Representation and Warranty Relief Type	Description						
Collateral	Collateral representation and warranty relief provides immediate relief from representations and warranties related to the value of the mortgaged premises, as more specifically described in the Seller's Purchase Documents.						
	There are two types of collateral representation and warranty relief which are summarized in the table below:						
	<table><tr><th>When the Collateral Representation and Warranty Relief type is...</th><th>Which means...</th></tr><tr><td>With an appraisal</td><td>Collateral representation and warranty relief may be granted based on an appraisal of the mortgaged premises as it relates to the value of the property upon sale of the mortgage to Freddie Mac.</td></tr><tr><td>With an appraisal waiver</td><td>Collateral representation and warranty relief also offers the option to waive the appraisal requirements for certain Loan Product Advisor Mortgages. This is known as Automated Collateral Evaluation (ACE). If you accept the appraisal waiver option, you are not required to obtain an appraisal and will be relieved of representations and warranties related to the value, including condition and marketability, of the property upon sale of the mortgage to Freddie Mac.</td></tr></table>	When the Collateral Representation and Warranty Relief type is...	Which means...	With an appraisal	Collateral representation and warranty relief may be granted based on an appraisal of the mortgaged premises as it relates to the value of the property upon sale of the mortgage to Freddie Mac.	With an appraisal waiver	Collateral representation and warranty relief also offers the option to waive the appraisal requirements for certain Loan Product Advisor Mortgages. This is known as Automated Collateral Evaluation (ACE). If you accept the appraisal waiver option, you are not required to obtain an appraisal and will be relieved of representations and warranties related to the value, including condition and marketability, of the property upon sale of the mortgage to Freddie Mac.
	When the Collateral Representation and Warranty Relief type is...	Which means...					
	With an appraisal	Collateral representation and warranty relief may be granted based on an appraisal of the mortgaged premises as it relates to the value of the property upon sale of the mortgage to Freddie Mac.					
With an appraisal waiver	Collateral representation and warranty relief also offers the option to waive the appraisal requirements for certain Loan Product Advisor Mortgages. This is known as Automated Collateral Evaluation (ACE). If you accept the appraisal waiver option, you are not required to obtain an appraisal and will be relieved of representations and warranties related to the value, including condition and marketability, of the property upon sale of the mortgage to Freddie Mac.						
The Last Feedback Certificate must indicate an Accept Risk Class on a collateral representation and warranty relief of "Eligible."							
For more information, refer to the Automated Collateral Evaluation job aid.							

Representation and Warranty Relief Type	Description						
Income	<p>Income representation and warranty relief may be granted from Freddie Mac's enforcement of certain selling representations and warranties related to the borrower's income upon sale of the mortgage to Freddie Mac. Loan Product Advisor will assess for income representation and warranty relief.</p> <p>There are two types of income representation and warranty relief which are summarized below:</p> <table><tr><th>When the automated income assessment with Loan Product Advisor is...</th><th>The loan is granted income representation and warranty relief* for ...</th></tr><tr><td>Using employer data</td><td><ul style="list-style-type: none">The accuracy of the income calculation related to eligible income sources described in Section 5901.2(b) that are on the income verification report; andThe accuracy and integrity of the data represented on the income verification report</td></tr><tr><td>Using tax return data</td><td>The accuracy of the income calculation related to eligible income sources described in Section 5903.2(b) on the Income Calculation Report</td></tr></table> <p>*Note: The Last Feedback Certificate must indicate an Accept Risk Class and an income representation and warranty relief of "Eligible."</p> <p>For more information, refer to Loan Product Advisor's Automated Income Assessment (Employer Data) and the Automated Income Assessment (Tax Returns) job aids.</p>	When the automated income assessment with Loan Product Advisor is...	The loan is granted income representation and warranty relief* for ...	Using employer data	<ul style="list-style-type: none">The accuracy of the income calculation related to eligible income sources described in Section 5901.2(b) that are on the income verification report; andThe accuracy and integrity of the data represented on the income verification report	Using tax return data	The accuracy of the income calculation related to eligible income sources described in Section 5903.2(b) on the Income Calculation Report
When the automated income assessment with Loan Product Advisor is...	The loan is granted income representation and warranty relief* for ...						
Using employer data	<ul style="list-style-type: none">The accuracy of the income calculation related to eligible income sources described in Section 5901.2(b) that are on the income verification report; andThe accuracy and integrity of the data represented on the income verification report						
Using tax return data	The accuracy of the income calculation related to eligible income sources described in Section 5903.2(b) on the Income Calculation Report						
Asset	<p>Asset representation and warranty relief may be granted from Freddie Mac's enforcement of certain selling representations and warranties related to the borrower's assets upon sale of the mortgage to Freddie Mac. Loan Product Advisor will assess for representation and warranty relief eligibility.</p> <p>The table below summarizes the asset representations and warranties that will not be enforced on eligible loans:</p> <table><tr><th>*Asset Representation and Warranty Relief is granted for...</th><th>Which means...</th></tr><tr><td>Sufficiency of verified assets</td><td>The Borrower has sufficient verified assets to cover the "Total Funds to be Verified" amount on the Last Feedback Certificate.</td></tr><tr><td>Asset Verification Report information</td><td>The accuracy and integrity of the data provided on the Asset Verification Report is validated.</td></tr></table> <p>*Note: The Last Feedback Certificate must indicate an Accept Risk Class and an asset representation and warranty relief of "Eligible."</p> <p>For more information, refer to Loan Product Advisor's Automated Asset Assessment job aid.</p>	*Asset Representation and Warranty Relief is granted for...	Which means...	Sufficiency of verified assets	The Borrower has sufficient verified assets to cover the "Total Funds to be Verified" amount on the Last Feedback Certificate.	Asset Verification Report information	The accuracy and integrity of the data provided on the Asset Verification Report is validated.
*Asset Representation and Warranty Relief is granted for...	Which means...						
Sufficiency of verified assets	The Borrower has sufficient verified assets to cover the "Total Funds to be Verified" amount on the Last Feedback Certificate.						
Asset Verification Report information	The accuracy and integrity of the data provided on the Asset Verification Report is validated.						

NOTE: If a loan(s) is ineligible for representation and warranty relief of collateral, income or asset, it may still be eligible for relief offered through Freddie Mac's selling representation and warranty framework as described in Guide section 1301.11.

Click the tabs to learn about the Loan Selling Advisor process and tips for confirming the loan's representation and warranty relief status.

If you have other questions regarding Loan Selling Advisor functionality, or you are a new customer and need help with it, refer to the [Loan Selling Advisor web page](#).

How to Confirm and Retrieve a Representation and Warranty Relief Status

You must complete the following actions in Loan Selling Advisor to confirm and receive a representation and warranty relief status (the overall relief decision).

1. Create a loan.
2. Assess (also referred to as Evaluate) the loan. Assessment triggers confirmation of representation and warranty relief eligibility.
 - ◇ If you edit data after the initial assessment, you must re-assess the loan. Each re-assessment generates a re-assessment of representation and warranty relief and may result in a relief status change.
3. Retrieve and review the representation and warranty relief status and assessment messages.

Note: The loan must have been previously submitted to Loan Product Advisor for Loan Selling Advisor to confirm representation and warranty relief eligibility.

The representation and warranty relief status and underlying relief messages can be accessed on a loan-level basis. Additionally, these messages are final when the loan reaches a Settlement Locked status.

NOTE: Best Efforts loans must be closed loans and must contain complete loan data to be eligible for representation and warranty relief.

Representation and Warranty Relief Status and Relief Messages

Loan Selling Advisor confirms the loan's overall representation and warranty relief status for each relief type. In addition to the relief status, each loan receives relief messages to clarify the overall status.

Loans that receive a Representation and Warranty Relief Status also receive associated messages. The table that follows describes the types of representation and warranty relief and the associated status and message types:

Representation and Warranty Relief Type	Representation and Warranty Relief Status (Overall Decision)			
	Y = Yes	N = No	Unavailable	Blank
Collateral with an Appraisal	This loan has been granted collateral representation and warranty relief for value.	Based on Freddie Mac's overall assessment of loan and collateral risk, including appraisal quality, collateral quality and loan characteristics, this loan is not eligible for collateral representation and warranty relief; however, it may be eligible for relief offered through Freddie Mac's selling representation and warranty framework.	We are unable to assess this loan for collateral representation and warranty relief at this time. You may resubmit for an assessment or proceed with funding and may be eligible for relief offered through Freddie Mac's selling representation and warranty relief framework.	Loan has not yet been assessed.
Collateral with an Appraisal Waiver (ACE)	Loan is eligible for collateral representation warranty relief with an appraisal waiver. Seller is relieved of representations and warranties related to value, condition and marketability.	This loan is no longer eligible for an appraisal waiver because one or more of the key data elements originally used to obtain the waiver has changed. Verify data as noted in additional messages.	Appraisal waiver eligibility cannot be validated at this time. Please re-evaluate the mortgage at a later time.	Loan has not yet been assessed.

Representation and Warranty Relief Type	Representation and Warranty Relief Status (Overall Decision)			
	Y = Yes	N = No	Unavailable	Blank
Income	This loan has been granted income representation and warranty relief.	Based on Freddie Mac's overall assessment, the loan is not eligible for income representation and warranty relief; however, it may be eligible for relief offered through Freddie Mac's selling representation and warranty framework.	Unable to evaluate the loan for income representation and warranty relief at this time due to an internal error, therefore, the eligibility is unavailable. Please re-evaluate the loan and if you continue to receive this message, contact Customer Support (800-FREDDIE) for assistance.	Loan has not yet been assessed.
Asset	This loan has been granted asset representation and warranty relief.	Based on Freddie Mac's overall assessment, the loan is not eligible for asset representation and warranty relief. However, it may be eligible for relief offered through Freddie Mac's selling representation and warranty framework.	Unable to evaluate the loan for asset representation and warranty relief at this time due to an internal error, therefore, the eligibility is unavailable. Please re-evaluate the loan and if you continue to receive this message, contact Customer Support (800-FREDDIE) for assistance.	Loan has not yet been assessed.

In addition to the decision status, loans may receive assessment messages which are comprised of two parts:

1. a message that reflects the overall status, and
2. associated messages to provide clarification when the decision status message indicates the loan is not eligible for a specific type of representation and warranty relief.

While each loan receives an eligibility assessment in Loan Product Advisor (if submitted to Loan Product Advisor) and confirmation in Loan Selling Advisor, the status in Loan Selling Advisor may be different than the preliminary assessment received in Loan Product Advisor or validation in Loan Quality Advisor if data changes prior to delivery.

NOTE: Status and Relief Messages are available for export.

Loans with a Status of “No” or “Unavailable”

No later than the contract fulfillment or expiration date:

- Loans with representation and warranty relief status of “No” or “Unavailable” are not eligible for relief; however, they may be eligible for relief offered through the Freddie Mac selling representation and warranty framework, as indicated in the Freddie Mac *Single-Family Seller/Service Guide* Section 1301.11.
- Loans with a “Blank” status cannot proceed to funding because they have not been assessed for purchase eligibility and representation and warranty relief. (All loans must be assessed for purchase eligibility to proceed to funding.)
- Loans with a representation and warranty relief status of “No” or “Unavailable” automatically proceed to funding or settlement after all critical purchase edits are cleared and delivery requirements are met. If you do not want the loan to proceed to funding or settlement, do the following:
 - ◇ If the representation and warranty relief status is...
 - » Unavailable. Re-assess the loan after the system is available, or remove the loan from the contract before the loan status changes to “Settlement Locked.” Furthermore, if the loan is subject to Form 996E, *Warehouse Provider Release and Transfer*, the loan must be removed from the contract before Form 996E is recorded in Loan Selling Advisor.
 - » No. Remove the loan from the contract before the loan’s status changes to “Settlement Locked.”

NOTE: Best Efforts loans cannot be removed from a contract.

Retrieve and View Status and Associated Messaging Information

Several pages have been updated to include representation and warranty relief information. The following table identifies the page name, location of the status and message(s), additional display criteria information and an example of the page.

Page Name	Status and Message Location and Additional Display Information
Evaluate Loan	<p>The representation and warranty relief status displays in the Loan Data panel. Click on the Loan Data tab to expand the panel, and you will see the three relief types of collateral, income and asset along with a relief status of:</p> <ul style="list-style-type: none">• Yes• No• Unavailable <p>If you selected one or more loans from the Loan Pipeline to evaluate, the Loan Details header displays one loan at a time and displays the most relevant loan data elements. The Loan Data panel displays all loan data elements of the Loan Details.</p> <p>The message categories display for each loan. The number of messages display for each category. Review the representation and warranty relief (R&W* Relief) messages and make corrections to the loan data, if applicable.</p> <p>Messages in the LIST view are hyperlinked to a DETAILS view. Click DETAILS to collapse the LIST view to display one message at a time. Use the navigation arrows to advance or return to messages.</p>

The screenshot displays the 'Evaluate Loan' interface in the Loan Selling Advisor. The top navigation bar includes tabs for CONTRACTS, LOANS, EXPORT DATA, THIRD PARTY, and SETTLEMENTS. The main content area is titled 'Evaluate Loan' and shows 'Loan 1 of 3'. The 'Loan Details' section includes fields for SELLER LOAN IDENTIFIER, BORROWER, and MORTGAGE CONFORMITY TYPE (Conforming Mortgage). Below this, there are three tabs: Critical Errors (12), R&W* Relief (6), and Warnings (1). The R&W* Relief tab is active, showing a table of messages categorized by COMPLIANCE TYPE (Collateral, Income, Asset). The 'Loan Data' panel is expanded on the right, displaying various loan data elements and their R&W* Relief status. The 'EVALUATION DECISION' is shown as 'No'.

COMPLIANCE TYPE	MESSAGE
Collateral	The Appraisal Identifier must be provided in order to be eligible for collateral representation and warranty relief.
Collateral	Based on the overall assessment of loan and collateral risk, including appraisal quality, collateral quality and loan characteristics, this loan is not eligible for collateral representation and warranty relief; however, it may be eligible for relief offered through Loan Selling Advisor's selling representation and warranty framework.
Income	The loan must be submitted to Loan Product Advisor to be eligible for income representation and warranty relief.
Income	The Borrower Taxpayer Identifier Values submitted for the borrowers in Loan Selling Advisor must match the Borrower Social Security Numbers submitted in Loan Product Advisor.
Asset	Based on Freddie Mac's overall assessment, the loan is not eligible for asset representation and warranty relief. However, it may be eligible for relief offered through Freddie Mac's selling representation and warranty framework.
Asset	The Borrower Taxpayer Identifier Values submitted for the borrowers in Loan Selling Advisor must match the Borrower Social Security Numbers submitted in Loan Product Advisor.

Import Loan Results

The Representation and Warranty Relief Not Eligible column is divided into three subsection columns which are titled: CO (collateral), IN (income) and AS (asset).

- When a value of “zero” displays in any of the subsection columns, it indicates that all loans in the import file are eligible for that relief type.
- When a numeric value greater than zero displays in any of the subsection columns, it represents the number of loans in the import file that are not eligible for that relief type. Click the numeric value (a hyperlink) to view the overall relief message and (when applicable) associated messages. If the subsection column is blank, it indicates the import file has not been assessed.

Import Loan: Results

View errors by clicking on the numbers in the errors columns. Click on the Refresh Import Status button to update the Status.

Large import files may take some time to process. While the import is in the process, other tasks in the system can be performed.

Export Data

Loan Selling Advisor's Export Data function provides the capability of exporting loan or contract data using preset data sets with specific file formats. The export files are revised to include collateral, income and asset data.

The following table identifies data sets that contain certain representation and warranty relief information.

Export Data Sets with Representation and Warranty Relief Information		
Report Name	R&W Relief Status	R&W Relief Message(s)
Evaluation Issues MISMO 3.0 (Assessment Issues)	Yes	Yes
R&W Relief Details	Yes	Yes
Summary Data MISMO 3.0 (Seller Summary)	Yes	No

Note: In addition to the representation and warranty relief status and relief messages, the representation and warranty relief details export data set contains the following data:

- Export Created Date and Time
- Investor Contract Identifier
- Loan Status
- Primary Borrower First Name
- Primary Borrower Last Name
- R&W Relief Last Update Date/Time
- R&W Relief Type = Collateral, Income and Asset
- Seller Loan Identifier
- Seller/Aggregator Number

You can create a custom dataset from any predefined dataset (a predefined collection of data elements either delivered to or generated by Loan Selling Advisor) by adding or removing fields as needed. Custom datasets, based on your business needs, can be used for tracking or reporting purposes. To further assist you with the export functions, how to create or modify customized exports, and exporting datasets, refer to the following additional resources:

- [Export Data](#)
- [Implementation Guide for Loan Selling Advisor Export \(Phase 4a/5\) - Sellers](#) (export specifications)
